

NZISM is New Zealand's leading professional association for health and safety practitioners.

We serve our community of 2,700 members via a nationwide network of 14 branches and are committed to providing members with an unrivalled suite of membership benefits. One of the key benefits of membership is the provision of CPD, which we deliver nationally and locally, online and face-to-face.

Nippin Anand

NZISM's national roadshow enables members to meet and learn from internationally renowned OHS speakers/educators. This year, flying in from Scotland, we are delighted to be working with Nippin Anand.

Nippin is a former master mariner with a Master's degree in Economics, a PhD in Social Sciences and Anthropology, and a mission to better understand human decision-making.

Why learn iCue™?

iCue™ will help you to map conversations (eg. events, accidents, risk assessments, board meetings), visualise how humans make decisions (using a whiteboard), and surface the hidden biases and assumptions in your language.

Practicing the iCue™ method will help you to:

- sharpen your risk maturity,
- improve your cultural intelligence, and
- adopt a pro-active and balanced approach to risk management.

This is a full-day workshop. Don't miss the opportunity to learn from the master himself.

The way you frame and ask a question will determine what you get back. It's powerful.
